SILEO AGED CARE BED SELF HELP POLE

~~\$186.00~~ \$137.50

SKU: 200432

Category: [Bed Accessories](#)

PRODUCT DESCRIPTION

The Sileo Aged Care Bed is a fully featured, easy to operate, electric bed designed for residential care facilities. With high-low range, safe and sturdy scissor lift mechanism, inbuilt base extension, removable head and foot panels and multiple positioning, this bed is designed for optimum support, strength and safety.

Sturdy, Slatted Frame

Operates as a high-low, four part profiling bed, with electric adjustable bed height, back rest, knee break and heel lift. Powered by a reliable Dewert drive system, with an inbuilt backup battery available as an optional accessory. Slatted design promotes air circulation for increased comfort.

Hand Controller

Easy to use, water resistant electronic hand controller with soft press buttons and lock out function.

Scissor Lift Mechanism

The high-low scissor lift with cross support ensures the platform moves straight up and down, reducing the risk of damage to walls or other equipment around the bed.

Central Locking Castors

Central locking foot operated bar at bed base. Smooth glide semi- enclosed castors are designed to minimise the build up of dirt and dust for easy cleaning and effortless operation.

Quick Release Panels

Removable head and foot panels for easy caregiver positioning. Classic curved design in two timber finishes or moulded polymer design with inbuilt handles and wall protectors.

Base Extension

The built in base extension increases the length of the bed platform by a maximum of 200 mm.

Bed Height Range 330 ?? 780 mm
