# Birdie Evo

**OPTIMISED DESIGN FOR SAFE TRANSFERS**

**SLOW'R® | SMARTLOCK™ | HOOK DESIGN**

**Yes, you can.®**

# An evolution in mobile floor lifters

Our BirdieEVO family has been designed to offer a high feature-set of options that have been blended with new technologies to provide maximum comfort and security when lifting or transferring a patient to or from a bed, chair or even the floor.

Based on the renowned Birdie, the range has been customer insight-led, encompassing everything that was valued on the Birdie whilst bringing in features to further enhance the client and carer experience.

## Impressive lifting range

The BirdieEVO range encompasses an ergonomic lift that allows the client to be easily rotated 360°, making positioning much easier for the carer and reducing anxiety for the client.

## Maximised space

The high boom ensures there is space for the client, even when the hoist is in its highest position, and the optimised space in front of the actuator reduces the risk of injury to the client's knees.

## Easy to handle, transport and store

Our BirdieEVO family can be easily folded and unfolded without the need for tools. They take up minimal space when stored and are easy to push and transport. If required, the mast can be very easily detached from the base (no tools required).

The BirdieEVO COMPACT has a low weight of 31 kg making it even easier to transport and store.

# Introducing the Birdie EVO family...

## Birdie EVO COMPACT

**Smaller footprint for easier maneuverability**

A smaller size allows the BirdieEVO COMPACT to easily operate in environments where space is limited.

<b>Lifting Range:</b>	530 - 1590mm
<b>Safe Working Load:</b>	150kg
<b>Turning Diameter:</b>	1070mm

## Birdie EVO

**The standard in client lifting**

A redesigned version of the market leading Birdie mobile floor lifter, designed to support safe transfers in both home-care and long-term care environments.

<b>Lifting Range:</b>	415 - 1660mm
<b>Safe Working Load:</b>	180kg
<b>Turning Diameter:</b>	1400mm

## Birdie EVO XPLUS

**Advanced lifter for extended SWL**

Our XPLUS model is a line extension based on the Birdie EVO PLUS with a special reinforcement to be able to lift a heavier client.

<b>Lifting Range:</b>	415 - 1660mm
<b>Safe Working Load:</b>	210kg
<b>Turning Diameter:</b>	1430mm

# Exclusive Features

## Slow'R®

Integrated dampener greatly reduces rocking movement.

## Smartlock™

Exchange spreader bar quicker, more safely and easier than ever before with our quick release mechanism. No tools required.

## Hook Design

Securely attach slings with one hand thanks to a user-friendly hook design.

## Additional features:

- Ergonomic push bar makes handling and manoeuvring even easier.

- Distinct curved design of boom and spreader bar allows carers to maintain eye contact with clients at all points of a transfer.

- The ergonomic design of the legs, with their smooth edges and natural curve, gives a cocoon like feeling and easily moves around comfort chairs or power wheelchairs

## 3 key features at a glance

### **Smartlock™** Simplify and secure the locking

A quick release mechanism makes it simple and safe to exchange the spreader bar without tools. Enhanced safety is provided via a swallow tail connection that is further secured by a locking pin to ensure both parts of the system remain in place.

### **Slow'R®** Reduce the rocking

A dampener has been designed and integrated into the boom to reduce the rocking movement of the client, giving them a more comfortable experience and providing carers with more control during lifts and transfers.

### **Hook Design™** Attach slings easily

An ergonomic hook design allows the loop on the sling to be attached with just one hand. A wider hook makes positioning loops easier, whilst the hook's nose has been designed to prevent slings sliding out unintentionally, reducing the risk of injury.

**Yes, you can.®**

# ISA™

INVACARE STAND ASSIST

## OPTIMISED DESIGN FOR COMFORTABLE TRANSFERS

LOWER LEG SUPPORT | EXTENDABLE LIFTING ARM  
ERGONOMIC HAND GRIPS

*Yes, you can.®*

# An evolution in stand assist lifters

## Designed to offer the best lifting experience for client and carer

Our versatile Invacare Stand Assist lifter has been designed to suit a range of users who require assistance during a transfer but can weight bear.

The Invacare Stand Assist lifter provides safety, comfort and a more pleasant experience for clients. ISA is the product for those independent individuals who are in need of some assistance.

As a caregiver, usability is a fundamental element, which is why the ISA has a reduced, curved overall base dimension and reduced product weight. In many cases, the caregiver may be a family member, and therefore the ease of use is imperative. Dismantling this product can be done without any tools, and thus transportation can be achieved easily.

ISA features many options and accessories to adapt the lifter ergonomics to the **user's body shape** and dimensions.

### Design improvements for clients

- ▶ **Ergonomic hand grips:** to fit the natural shape of the hand and position of the wrist.
- ▶ **Extendable lifting arm:** different length settings to suit the body height of various clients.
- ▶ **Lower leg support:** many height settings to fit with different lower leg dimensions.

### Design improvements for carers

- ▶ **Push bar:** shape and dimension based on the average elbow height and shoulder width of typical carer, to ensure smoothness and ease when manoeuvring.
- ▶ **Foot pedal:** non slippery and large surface for enhanced user comfort.

# Introducing the **ISA** range

## ISA COMPACT

Perfect for an environment with limited space

**Max Safe Working Load:** 140kg  
**Recommended user height:** 1400 - 1800mm  
**Leg operation:** Manual

## ISA XPLUS

Superior care for plus size clients

**Max Safe Working Load:** 200kg  
**Recommended user height:** 1400 - 2000mm  
**Leg operation:** Electric

## Available Accessories

- ▶ Two stand assist slings: Stand Assist Stand and Transfer Stand Assist, which has additional leg support
- ▶ Protective covers for legs
- ▶ Footplates: Three heights available with removable heel block and round shape for toilet approach. Accommodates users with a shoe size up to size 14 (32cm). Intermediate footplate supplied with lifter

# Exclusive Features

## Extendable lifting arm

- ▶ The **TelescoLift** can be adjusted to nine different length positions for different client heights, offering **maximum flexibility**.

## Ergonomic hand grips

- ▶ The unique design perfectly fits the natural shape of the hand for a **safe grip**.

## Lower leg support

- ▶ The lower leg cushion provides six height positions with a swivel **ErgoSupport** option for **optimum comfort**.

## Additional features

- ▶ **Foot plate:** three heights available with removable heel block and round shape for toilet approach. Intermediate footplate supplied with lifter.
- ▶ **Push bar and foot pedal:** ergonomic shape for easy lifter operation.
- ▶ **Sling hooks:** flexible and secured hooks for a quick, straightforward sling attachment.
- ▶ **Leg band:** padded for extra comfort. Easy to exchange and washable. Leg band included
- ▶ **Curved legs:** ergonomic shape for easy manoeuvring around chairs and toilet bases.
- ▶ **Lockable rear casters:** added security and safety for the patient and user.
- ▶ **Removable battery:** have a second battery charging to reduce lifter downtime. (Additional battery and external charger inc with ISA XPlus).
- ▶ **Foldable:** ergonomic shape for easy manoeuvring around chairs and toilet bases.

**Yes, you can.®**

# 3 key features and benefits

## Ergonomic hand grips

Positioning the hands in a natural, comfortable and intuitive way

- Special shape with a curved angle, offering a **more natural position** for the hand.
- Adapted width for the average shoulder dimension, for minimal body strain.
- **Soft touch** material for comfort during transfer.

 PATENT PENDING

## TelescoLift Extendable lifting arm

Adapting the lifter to the client's height, condition and preference

- One flexible lifter with **nine length positions**, for lifting various clients.
- Easy to access lever with a self-locking mechanism for a fast and secure lift.
- The first position is very compact, offering **easy storage**.
- Suits patients from 140cm to 200cm tall

 PATENT PENDING

## Lower leg support

Maintaining the lower legs with maximum comfort

- Simple one hand **height adjustment** with six positions, no tools required.
- Smooth foam cushions that can be easily replaced when needed.
- Now offering an **ErgoSupport** option, which follows the natural lower leg movement for optimum comfort.

# ISA Slings

## Stand Assist Sling

The Invacare Stand Assist Sling offers a comfortable and safe transfer for clients who have some weight bearing ability, but cannot stand independently. In addition, the client should be coherent, have good body and head control and the ability to grip the lift boom during transfer. The sling is well padded and comes with non-slip material on the back to ensure a comfortable transfer position.

				Item code/Fabric
Size	A	B	C	Polyester fabric
S	260	840	950	1484685
M	330	895	1170	1484686
L	360	950	1270	1484687
XL	360	1020	1810	1484688

## Transfer Stand Assist Sling

The Invacare Transfer Stand Assist Sling can be used with the ISA Lifters and enables a simple seated transfer. This sling is used for those with good body and head control who are able to grip the lift boom.

				Item code/Fabric
Size	A	B	C	Polyester fabric

# Invacare Slings

**OPTIMAL FIT AND COMFORT**  
PASSIVE LIFTERS | ACTIVE LIFTERS

**Yes, you can.®**

**Making Life's  
Experiences Possible**

# The Slings Range

## Providing the optimal fit

---

Our new sling range has been designed to provide a safe, supportive and comfortable transfer for the client. The range provides options for various models, sizes and fabrics to ensure the sling fits perfectly to each person, whether they have some mobility impairment or require full body and head support.

Our team of experts and occupational therapists have spent time ensuring the slings are intuitive and easy to handle for the carer. This leads to reduced application times and improved confidence.

The range consists of eight models, each in up to six sizes and up to two fabric options to choose from.

This impressive selection ensures there is a sling suitable for everyone and for every use; daily transfer from bed to wheelchair/armchair, a toilet transfer or even for showering or bathing.

# 4

## KEY FEATURES

### ◀ Optimal fit ▶

- ▶ The right sling for the right client and transfer type
- ▶ Impressive range with 8 models, 6 sizes and 2 fabrics
- ▶ Well thought-out sling patterns supporting the right body parts
- ▶ All slings have loop attachment for a high spreader bar compatibility

### Enhanced safety and confidence ▶

- ▶ Application videos easily accessible via QR code
- ▶ Clear sling labels with intuitive sling application drawings

### ◀ Optimal comfort ▶

- ▶ Soft touch materials for increased comfort
- ▶ Padded back and leg sections for optimal weight distribution
- ▶ Cushioning under the tender armpit area

### Easy to apply ▶

- ▶ Positioning pocket supports to slide between the client and backrest whilst sitting
- ▶ Two centre-line markers indicate the position over the spine
- ▶ Coloured loops facilitate the selection for the right positioning

**Yes, you can.®**

# Selecting the right sling model

Always ensure the sling is specifically designed for the hoist you are using as failing to do so, may cause serious injury. There are different types and sizes of slings available. Selecting the most suitable sling for your client will ensure safety and improve comfort during the transfer. You should consider:

- Client's functional level, size, width and weight
- The type of transfer
- Sling shape matching body control e.g. U-shape or full-body support
- Any preferred position as the result of any medical condition e.g. stroke or amputation
- Material type and any padding
- Any sensitivity to pressure in any area

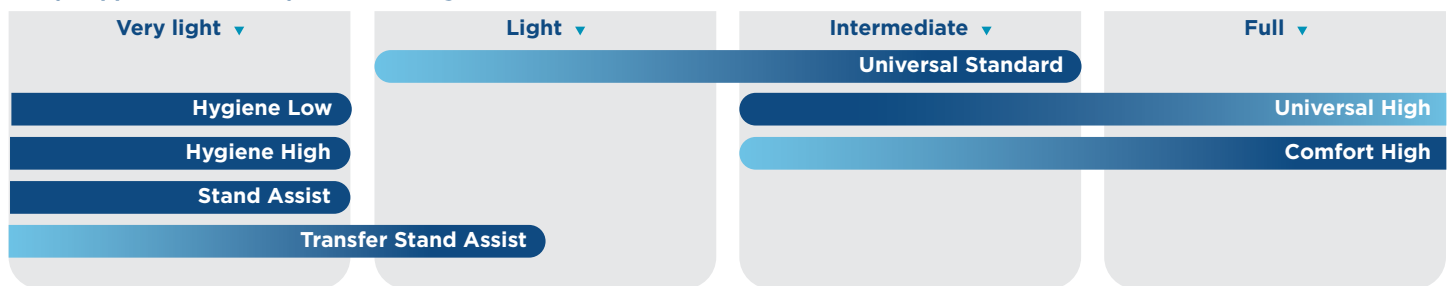

The main objective of the sling selection is to give the amount of body support that is needed. **Invacare Slings** are designed to give support in those areas where body control and muscle tone are reduced. The main body parts to assess are the legs, hip, trunk and head. The following chart gives an overview of which sling model is suitable depending on the client's physical ability:

Some medical conditions such as stroke, orthopedic conditions, amputations or certain wounds may affect sling choice.

## Body Control assessment and Transfer Type:

## Body Support Provided by Invacare Slings Model:

# Selecting the right size

To select the correct sling size, the most important measurements are the hip width and back height in the sitting position. For slings with belts, the waist circumference is important, too.

The client's weight needs to be considered mainly for the sling's maximum safe working load. It's inferior to indicate the right sling size.

If no head support is needed, the correct back height is from the lower back until the shoulder/neck. With the need of head support the measurement needs to include the head, too.

## Invacare Slings sizes and safe working load:

Size	XS	S	M	L	XL	XXL
Safe Working Load	200 kg	200 kg	200 kg	200 kg	250 kg	300 kg

► If the sling is too big, the client may slip out. If the sling is too small, the client may still slip out, particularly with less body control. It could also exasperate the client's medical condition. When selecting a size, if your client is in-between sizes, having a slightly smaller sling, could keep your client more secure.

# Sling features

Invacare slings have several features that enable you to position patients easily.

# Invacare Slings for passive lifters

## Universal Slings

All-round slings for everyday patient handling routines.

### ◀ Universal High

- Supports the whole body, including the head
- Client sits in slightly reclined position
- Suitable for those with limited control of the head, trunk and hips
- Can be used for transfers from a lying position, lifting from the floor and seated to seated transfers

For more comprehensive pre-sales information about this product, including the product's user manual, please see your local Invacare website.

All slings should be tested and adjusted to the individual client to ensure optimal comfort and safety during transfers.

A risk assessment must be carried out prior to use of one manufacturer's sling on another manufacturer's hoist.

## Fabrics

### Polyester - Solid

- A strong material that is hard-wearing and easy to apply. It slides smoothly into place and dries quickly after washing. This comes as standard on all models.

### Polyester - Mesh

- Also known as net fabric, the mesh option is ideally suited for bathing or showering environments. It has quick drainage and drying properties.

Yes, you can.®

# Sling label

Each Invacare sling has an external label with information that supports you through application and patient positioning.

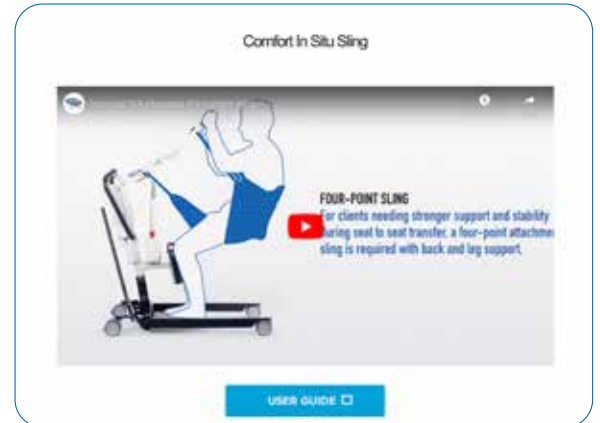

## QR-Code

You can scan the QR (Quick Response) code using your Smartphone to access a sling application video and the user manual.

## Microsite with all sling application videos

<https://marketing2.invacare.eu.com/slides>

## Patient name

There is placeholder for the patient name on the label, allowing you to personalise the sling.

# Various positioning options

## Suspension strap

The suspension straps are equipped with colour coded loops which offer different lengths in order to place the patient in different positions.

Before applying the loops consider the users end position to choose the most appropriate loops. The pictograms on the sling's external label gives you quick support to remember the different positions. Additionally you can use loop markers to indicate the chosen loops.

For a transfer into a sitting position, place the patient as vertical as possible in the sling. Therefore, use shorter loops at the shoulders and longer loops at the legs.

For a semi-recumbent position in the sling use e.g. the blue loops on both the shoulders and on the legs.

For a transfer into a lying position use longer loops at the shoulders and shorter ones at the legs.

## IMPORTANT!

For an even lift, always ensure the coloured loops selected on one side of the body match the other i.e. shoulder straps match and leg straps match accordingly.

# The pivot sling range

Pivot clip release strap colour-coded by size

Care label with size and identification

Body section

Positioning handles

Padded leg section

Pivot clip release strap colour-coded by size

Upper body pivot clips

Leg section pivot clips

## Selecting the correct size

Typically there is a degree of overlap between each sling size within a particular model. If the patient falls between two sizes, it is generally better to select the smaller size of sling, unless you are aware that the patient is likely to grow.

### Measurements required for General Purpose with Head Support (Pivot and Yoke):

- Shoulder width
- Coccyx to top of head (General Purpose only)

### Measurement required for Hygiene (Pivot and Yoke):

- Shoulder width

## Measurements

One of the most important factors to perform a safe transfer is the match between hip/trochanter width and the measurement of the sling's opening between the leg support. If between sizes the smaller size may keep the client more secure.

### Pivot General Purpose with Head Support

Codes		Shoulder Width (mm)	COCCYX TO TOP OF HEAD (mm)
SL146191	<b>S</b>	600 - 700	640 - 780
SL146291	<b>M</b>	700 - 810	750 - 900
SL146391	<b>L</b>	760 - 870	830 - 1000

### Pivot Hygiene

Codes		Shoulder Width (mm)
SL247191	<b>S</b>	500 - 600
